The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 48, 49, 51-59 and 61-64 are rejected under 35 U.S.C. 102(b) as being anticipated by Oda *et al.* (US 4,551,220), for reasons of record.

Claims 1-47, for reasons pointed out by applicants, are allowed.

Claims 50 and 60 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. These claims recite water vapor permeance values that are outside the scope of those exhibited by the gas diffusion materials of Oda *et al.*

Applicant's arguments filed 27 March 2006 have been fully considered but they are not persuasive.

Applicants argue that inherency cannot be based on probability or possibility, but must necessarily result from the characteristics disclosed in a reference, and that this requirement is not met because most of the materials disclosed by Oda *et al.* exhibited a water vapor permeance greater than the presently claimed range, as shown by the Declaration by inventor Mathias. This is not persuasive because the showing that some materials exhibit a permeance outside the range and others show a permeance inside the range would mean that some materials disclosed by Oda *et al.* meet the present claims, while others do not. There is no requirement under §102, with respect to inherency or not, that all embodiments disclosed by a reference have to fall within a

claim in order to justify a rejection. The value of  $2.0 \times 10^{-4} \text{ g}/(\text{Pa s m}^2)$ , calculated by inventor Mathias for a porosity of 0.4 and a thickness of 500 microns, would meet the recitation “less than about  $2.0 \times 10^{-4} \text{ g}/(\text{Pa s m}^2)$ ”, recited in claims 49 and 59.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
